EDXIS

CHROMEBOOK 11 (S30-CT)

Designed for Education
with Unique Features that
Promote Learning

A BREAKTHROUGH DESIGN.
MORE TIME, LESS HASSLE

In collaboration with Intel Education, the brand new **Edxis Chromebook 11 (S30-CT)** is hassle- free right out of the box - teachers and students can get up and running quickly. They get their own personalized apps, settings and bookmarks when they log in.

LOW MAINTENANCE,
HIGH FLEXIBILITY

Chromebooks are designed from the ground up to defend against malware and viruses. Security and software updates install automatically as well.

In addition, the rotatable camera supports scientific enquiry activities along with giving students flexibility in how they capture images and videos. The retractable handle also makes it easy to carry. A student can also "hook" the device to their cubby or locker.

STRONGER FROM THE OUTSIDE IN.
DEEPLY POWERFUL.

The Edxis Chromebook 11 (S30-CT) is built to withstand bumps and accidental drops from desktop height (up to 70cm).

Besides, the water-resistant keyboard channels liquids (up to 330ml) away from the electronics to prevent damage. The rugged design helps to reduce out-of-classroom servicing downtime, replacement part costs, and helps to extend the life of the device.

The fanless design reduces noise and eliminates the need for bottom vents. In addition, with up to 12 hours of battery life, teachers and students can work where they need to without a power cord.

PRODUCT SPECIFICATION

Designed for Education with Unique Features

Unique features that promote learning

- 180° rotatable camera that supports scientific inquiry along with photo and video projects
- Retractable handle that makes it easy for students to carry and less likely to be dropped
- Anti-glare screen that reduces student eyestrain
- Up to 12 hours of battery life for all-day learning

Rugged & Durable

- Drop resistant - built to withstand bumps and accidental drops from up to 70cm. Stronger, thicker rear cover, frame around the screen sides and corners also absorb the force of bumps and reduce damage when dropped
- Water resistant keyboard channels spills (up to 330ml) away from the electronics to prevent damage. Sealed touchpad protects electronics from moisture and spills.
- Anti-peel keys resist removal by students
- Fanless design eliminates the need for bottom vents. No vents help to keep debris away from the electronics, helping to extend the life of the device

Operating System	Chrome OS 64bits
Display	16:9/HD (1,366 x 768)/Flat/Glossy type/LED backlight/ eDP interface; On cell Touch for finger
Connectivity	Intel® Dual Band Wireless / Bluetooth 802.11 7265AC
Processor	Intel® Celeron® Processor N4500 Dual Core
Memory	4GB LP-DDR4x, up to 2666 MHz
Storage	64GB eMMC
Camera/Microphone	USB interface HD camera integrated with LED indicator, rotational camera; Single digital microphone
Battery	Up to 12 hours of battery life. 6000mAh 2 cells battery pack (47.3Wh,2S1P , polymer)
System I/O	USB 3.0 (type A) gen1 x 2, USB Type C gen1 x 2 with PD function; 2 in 1 card reader (uSD socket , SD/MMC, push-push type)
Audio	HD Audio with Wave RT supported; 2.0W x 2ch (over 5cc)
Dimensions	290.36 x 198.64 x 20.3 mm (Length x Width x Height)
Weight	1.29 kg (with LCD and battery)
